CHAPTER 0: THE SYSTEM

Rolls and Story

This system is influenced heavily by DND and the D20 system. rolls are made using a d20, and determined based on the DC set by the GM. Please see the Damage table as to not kill your players. Rolls are random, and therefore should always matter. If players should succeed, do not tie rolls to the success, instead tie them to things that happen around the success. For example, if players have to do an investigation check to find the **TOME OF CORE PLOTPOINTS** in a monsters lair, a failure should not mean they don't find it, in stead they find it but the monster returns in time to attack.

The game is narrative and explicitly vague in an attempt to allow players and the GM to tell a story, the rolls adjusting for randomness, rather than a strict tactical game. GM's word is law, but beyond that the world should be rooted in a form of realism. Physics and natural order rule the rulings of the game.

CHAPTER 1: CHARACTER CREATION

Core Statistics

Characters are defined by **6 core stats**: Strength (Str), Dexterity (Dex), Constitution (Con), Intelligence (Int), Wisdom (Wis), and Charisma (Cha).

- **Stat Allocation:** You have **85 stat points** to distribute among these 6 stats.
- **Stat Cap:** The maximum score for any single stat at character creation is **20**.
- Optional Rule: Rol 5d6 drop lowest(CAP AT 20)
- Saving throws equal modifier plus proficiency

Character Building Steps

1. **Set Stats**
2. **Choose Equipment:** Select your Weapons and Armour.
3. **Choose a Pantheon & Parent:** Pick your divine parent, which determines your unique **Unleashed State**.
4. **Select Abilities:** Purchase abilities using your Ability Points (AP).

Abilities

Abilities are categorized by different tiers, each costing a different AP. AP is gained as an in game reward for players when they achieve heroic feats. Usually AP is only gained 1 at a time, forcing players to save, but may be given a few more if the feat is truly exceptional.
It is recommended to start our players of with at least 3 AP at the start of their adventure.

Tier	Ability Types Available	AP cost
Tier 1	Low level, character build abilities	1
Tier 2	Powerful utility abilities	2
Tier 3	Advanced game mechanics	3

Please see abilities in "Chapter 6: Big Tables" for a list of prewritten abilities

Divine Difficulty Class(DC)

Your Divine DC is where-against enemies will roll to test the affects and power of your abilities, sometimes players may have to roll against this amount as well, determining the success of their used abilities in extreme situations.

```
Divine DC = Proficiency x 3 + Wisdom modifier + Charisma modifier
```

Power of the Divine(PotD)

Demigods receive Power from their Divine parents. Power denotes an in game pool of points(like Mana) that demigods can use to power some of their abilities and enter their unleashed state.

Power of the Divine is limited to 6 per player(feel free to change this depending on game stage!) and replenish quickly. Players need to be in a safe(DM decides what that means) area for at least 30 uninterrupted minutes to regain their power.

Unleashed States

As an action you can Unleash your power. Burning up 3 PotD and gaining a level of fatigue, you become a vessel of pure descriptive potential energy, at least within their domains. Every Divine entity has a unique unleashed state. The unleashed state is a moment the demigod taps into their godly parents power, and for a moment wields it in their name. The following effects, while unique to your deity, will take affect:

- **Narrative Power:** While Unleashed you have access to every ability on your character sheet, and narrative control of the domains of your parent. The DM decides the extent and allowence of your power, but you hold the brush of fate.
- **Physical Changes:** glowing eyes, changing skin, hair floating weirdly; when the power of the gods flow through them, demigod's very bodies shift under the weight
- **Reality Bending Power:** The world shifts slightly darken, or the ground cracks open. Some effect effects end, and some may have no *noticeable* e
- **The Risk of Reward:** While in your unleashed st the energies of the universe also leaves you vuln attacks against you have disadvantage, and you checks, but if you were to take damage on your

Divine DC = Half

un-note

Unleash condition: To enter your unleashed state, a certain condition has to be met. This condition is different for each domain, but usually entails simple things such as being under the open air, on natural ground, or near a body of water.

Forced states: Unleashed states can also sometimes be forced by the divine parent, causing the demigod to enter their state for one turn without using PD. this is a rare condition that should almost never be seen. A sacred oath being broken. A graveyard desecrated or a temple destroyed. The unleash condition still has to be met.

Proficiency

Proficiency bonuses are derived from the total amount of AP a player has received/3 to a maximum of 6 or if you want it a bit tighter, you can follow the below table. this gives players a sense of growth beyond traditional leveling.

AP	Prof
0-3	+1
4-6	+2
7-9	+3
10-13	+4
14-17	+5
18-22	+6
23-30	+7
31+	+8

Proficiencies in skills are handled a bit differently. We get good at what we practice, and the longer you stay alive the more proficient you become in all areas of adventuring.
When players roll a natural 20 in an ability/skill check/saving throw, they note it down on their sheets. 3 Natural 20's in any skill/ability/saving throw grants you a permanent proficiency.

It is assumed you have trained with the weapon you start with. Changing weapons might affect your level of proficiency.

CHAPTER 2: COMBAT MECHANICS

The Nature of Combat

An attack roll does not represent a single swing, but rather a **series of attacks** where a player uses their full ability to fight and affect an opponent.

- **Attacking Multiple Times:** By default, you only roll to attack once. Only select, specific abilities allow you to attack more than once, essentially doubling your chance to wound a creature.
  Some abilities might allow you to attack multiple times but limited to either one or multiple opponents. This denotes abilities or attacks where a range of creatures can be hit(swinging or cleaving attacks) or where one creature is hit many times(Flashing metal or flurry attacks)
- **Narrative Impact:** Any other combat advantages or tactical flourishes are handled narratively, with certain abilities and the Damage Table taken into consideration. The demigods and dungeons campaign is supposed to let heroes feel epic when the story denotes, and fragile when they overreach.

Turn based combat

While ttrpg's inherently need turns to give everyone a fair chance, because of the high danger of combat it is encouraged that demigods follow a narrative path. While it is ultimately up to the players to decide what they want to do at any given moment, it is the task of the game master to make sure each player not only has a turn to enact their will, but is also a target to the various dangers of the campaign.

For combat specifically, every creature does one of the following:
Each turn:

- (1)Move
- (1)One Major Action
- (1)One Minor Action
  Major Actions:
- Attack
- Use Ability
- Grapple
- Brace/Block
- Unleash
- Help
  Minor Actions:
- Draw weapon

- Open door
- Stand up
- Speak
- Interact with object

After each creature explains their relative movement and makes their attack rolls, the GM narrates it all happening at the same time(with player descriptions if they are so comfortable) and that constitutes a round of combat, on which damages are settled and the group is allowed to start over, if they're still standing.

Resolving Attacks

Combat resolution pits an **Attack Roll** directly against the target's **Defense Bonus**.

1. The Attack Roll

The attacking player rolls a d20 and adds modifiers based on their attributes and gear:

```
Attack Roll = 1d20 + Dex/Str Modifier + Prof + Relevant Bonuses
```

> *Note: Whether you use Strength or Dexterity depends entirely on the weapon being wielded.*

2. The Defence Bonus

A defender's total passive avoidance and resilience is calculated as follows:

```
Defence Bonus = Int mod + Half Dex Score + Proficiency Bonus
```

Possible Additions to Defense:

- Armour rating modifiers *(see Armour Ratings table below)*.
- Skin hardness bonuses.
- Magical defenses.

Range & Movement

Range	Distance	Example		
Touch	Touch-1m	Grapple/knife		
Close	1-2m	Sword/handaxe		
Near	2-3m	Longsword/Spear	Glaive	Disadvantage at touch range

Range	Distance	Example		
Far	3-5m	Greatsword/Pike		disadvantage in tight spaces
Distant	5-25m	Bow	Hunting bow	Disadvantage in touch range
Extreme	25-100m	Longbow		Disadvantage in close range

A creatures base movement speed starts at dex score meters per "turn" as a standard. Certain creatures will get bonusses depending on divinity or race. Although turns are a loosely based concept, this should be a guide to the speeds of creatures relative to others moving in the same round.

For longer travel, groups have to move at the travel pace of the slowest creature. Creatures can move at their combat pace for extended periods of time but will suffer fatigue as stated in the fatigue table.

CHAPTER 3: ARMOUR & EQUIPMENT

Your armour tier dictates your baseline defensive value.

Armour Ratings Table

Dex Score Penalty	Armour Category	Examples	Defence Bonus (DB)
-1	Partial Armour	*Light protection, perhaps a simple leather breastplate or a cloak*	+2
-2	Light Armour	*Full protection but a light material, easy to move in*	+4
-3	Medium Armour	*Metal breastplate, Metal Helmet, better protection but slows you down*	+6
-4	Plated Armour	*Interlocking plates of metal covers most of your body, you are able to block many incoming attacks*	+8
-5	Heavy Armour	*Full layers of heavy steel armour protects every part of your body. Immovable as a mountain*	+10

The Shield / Cover Rule

If a demigod actively uses their turn to take cover or raise a heavy shield against an affect, it changes their defence:

- **Total Cover (Behind a thick stone wall):** Immune to the AoE.
- **Partial Cover / Raising a Shield:** The player gains **Advantage** on the saving throw, OR they automatically reduce the resulting wound damage by 1 level.

Weapons Table

Weapons are meant to portray their real life effects and abilities. Some complexities and mechanics are highly optional/flavourful, and while they do have supporting mechanics are originally meant to be used more narratively than physically.

Weapon Type	Examples	Range	Ability	Traits	Weapon Effects	Armour Bonus
Knife	Dagger, Dirk, Rondel	Touch	Dex	Concealable, Dual,	Bleed, Pierce	+1 Light, Medium, Plate

Weapon Type	Examples	Range	Ability	Traits	Weapon Effects	Armour Bonus
Punch Dagger	Katar	Touch	Dex	Concealable, Dual,	Pierce, Disarm	+1 Medium, Plate, +2 Heavy
Hatchet	Hand Axe, Tomahawk	Close	Dex	Thrown, Dual,	Cleave, Disarm	+1 Light
Club	Club, Baton	Close	Str/Dex		Stagger, Daze	+2 Partial
Mace	Mace, Morningstar	Close	Str		Crush, Daze	+1 Medium, +2 Plate
Flail	Flail	Close	Str	Flexible,	Ignore Guard, Disarm	+1 Plate
War Pick	Military Pick	Close	Str		Pierce, Crush	+2 Plate, Heavy
Sword	Arming Sword, Falchion	Close	Dex		Disarm, Riposte	+1 Light
Curved Sword	Scimitar, Dao, Talwar	Close	Dex		Bleed, Sweep	+1 Light
Rapier	Rapier, Smallsword	Close	Dex	Finesse,	Pierce, Riposte	+1 Medium
Sabre	Sabre, Messer	Close	Dex		Bleed, Disarm	+1 Light
Whip	Bullwhip	Near	Dex	Flexible,	Pull, Trip, Disarm, Entangle	—
Chain Weapon	Meteor Hammer, Chain	Near	Dex	Flexible, Two-handed	Pull, Grapple, Trip	+1 Medium
Rope Dart	Rope Dart	Near	Dex	Flexible, Concealable, Two-handed	Pull, Grapple, Bleed	+1 Light
Quarterstaff	Staff, Bo	Near	Dex	Two-handed	Trip, Push	—

Weapon Type	Examples	Range	Ability	Traits	Weapon Effects	Armour Bonus
Spear	Spear, Assegai	Near	Dex	Brace, Versatile	Brace, Pierce	+1 Medium
Trident	Trident	Near	Dex		Grapple, Pull	+1 Medium
Glaive	Glaive, Naginata	Near	Dex	Reach, Two-handed	Sweep, Trip	+1 Medium
Poleaxe	Poleaxe	Near	Str	Reach, Two-handed	Hook, Crush	+2 Plate
Bec de Corbin	Raven's Beak	Near	Str	Reach, Two-handed	Hook, Pierce, Crush	+2 Plate, Heavy
Halberd	Halberd	Far	Str	Reach, Two-handed	Hook, Sweep, Brace	+1 Medium, +2 Plate
Pike	Pike, Sarissa	Far	Str	Reach, Mounted, Two-handed	Brace, Push	+2 Mounted Targets
Lance	Knight's Lance	Far	Str	Mounted,	Brace, Pierce, Push	+2 Mounted Charge
Greatsword	Zweihander, Claymore	Far	Str	Reach, Two-handed	Cleave, Sweep	+1 Medium, Plate
Greataxe	Dane Axe, Bardiche	Far	Str	Reach, Two-handed	Cleave, Crush	+2 Medium
Maul	Great Hammer	Far	Str	Reach, Two-handed	Crush, Push, Daze	+2 Plate, Heavy
Scythe	War Scythe	Far	Str	Reach, Two-handed	Hook, Bleed	+1 Light
Chakram	Chakram	Distant	Dex	Thrown,	Bleed	+1 Light
Throwing Knife	Throwing Knife	Distant	Dex	Thrown, Concealable,	Bleed	+1 Light
Javelin	Javelin	Distant	Dex	Thrown,	Pierce	+1 Medium
Atlatl	Spear Thrower	Distant	Dex	Two-handed	Pierce	+1 Plate

Weapon Type	Examples	Range	Ability	Traits	Weapon Effects	Armour Bonus
Sling	Sling	Distant	Dex		Stagger	+1 Partial, +1 Medium
Blowgun	Blowpipe	Distant	Dex	Concealable, Two-handed	Poison	—
Shortbow	Hunting Bow	Distant	Dex	Two-handed	Bleed	+1 Light
Crossbow	Light/Heavy Crossbow	Distant	Dex	Reload, Two-handed	Pin, Pierce	+1 Medium, Plate
Composite Bow	Composite Bow	Extreme	Str	Two-handed	Pierce	+1 Medium, +2 Plate
Longbow	Longbow, Yumi	Extreme	Str	Two-handed	Pierce, Pin	+1 Plate, Heavy

Weapon Rules

Weapon Reach

Each weapon has a combat range representing the distance at which it is most effective. Whenever a creature uses its movement to enter your weapon's range, or moves through your weapon's inner range to reach you, you gain **Advantage** on the first attack you make against that creature before the end of the turn.

Weapon Effects

When an attack reaches the **Weapon Effect** result on the Damage Table, choose one of the effects listed for the weapon instead of **Trip**, **Grapple**, or **Disarm** as in the damage table

Effect	Rule
Bleed	Target immediately suffers the Bloodied condition.
Brace	See the Brace trait.
Cleave	After reducing a creature to Broken or Dead, immediately make another attack against a different creature within reach.
Crush	Reduce the target's Armour Defence Bonus by 1 against this attack.
Daze	Target loses its Minor Action next turn.
Disarm	Target drops one held item.

Effect	Rule
Grapple	Apply the Grappled condition.
Hook	Pull the target 2 metres or Trip it.
Ignore Guard	Ignore the Defence Bonus of Shields or Light Cover against this attack
Pierce	Ignore 1 Armour Defence Bonus.
Pin	If the target is adjacent to terrain, it becomes Restrained until it spends an action freeing itself.
Poison	Deliver any poison currently applied to the weapon.
Pull	Pull the target up to 2 metres toward you.
Push	Push the target up to 2 metres away.
Riposte	If the attack exceeded Defence by 10 or more, the target has Disadvantage on its next melee attack against you.
Stagger	Target loses any remaining movement this round.
Sweep	Trip the target. If an ability attacks multiple adjacent creatures, each creature hit is Tripped.
Trip	Target becomes Prone.

WEAPON TRAITS

Traits define the in game rules and abilities of a weapon, defining it from the rest of the weapon classes

Trait	Rule
2-Handed	Requires two hands to wield effectively.
Versatile	Can be wielded with one or two hands. While wielded in two hands, you can add a +1 to all attack rolls.
Dual	This weapon may be paired with another one-handed weapon. Dual wielding grants no additional attacks, but you may choose which weapon's effects and armour bonus apply to each attack. Abilities may interact with each weapon separately.
Concealable	May be hidden on your person. Drawing it can be part of movement instead of a minor action.
Flexible	Ignores the Touch Range disadvantage and can attack around shields or obstacles where appropriate.

Trait	Rule
Mounted	While mounted, after moving 2 meters in a straight line you gain advantage on attack rolls
Thrown	Can be thrown using its listed range.
Reload	Must be reloaded after every attack using a minor - major action, depending on weapon.
Brace	Gain Advantage on the all attacks against creatures that attempt to enter your range from the front this round.
Reach	Can attack while pulling back.
Finesse	+1 to attacks when in medium or lower armour.

Shields

Shield	Hands	Defence	Traits
Buckler	One	+1 DB	Quick, Light
Shield	One	+2 DB	Standard
Tower Shield	One	+2 DB	Heavy, Cover, Brace

Shield Traits

Trait	Rule
Quick	Drawing or stowing the shield does not require a Minor Action.
Light	Does not interfere with Dexterity-based weapons.
Standard	Functions as described in the Shield/Cover rules.
Cover	While using the Brace action, allies directly behind you benefit from Partial Cover.
Brace	While Braced, increase the Defence Bonus to +3 against attacks originating from your front.

Arrow Types

I **love** the bodkin idea because it's real history.

I'd also add three standard ammunition types.

Ammunition	Effect
Standard Arrows	Normal.
Broadhead	+1 Light Armour. Causes Bleed.

Ammunition	Effect
Bodkin	Shift the weapon's Armour Bonus one category Lighter (Light→Medium→Plate→Heavy). Cannot Bleed.
Barbed	Bleed. Removing the arrow requires an action or Medicine check.

Likewise for crossbows.

Bolts naturally start one armour category heavier.

CHAPTER 4: DAMAGE & WOUNDS

Each character has 3 wounds. Bruised, Bloodied and broken.
Each wound is inflicted by a different level of attack. Higher attack score denotes more damaging attacks.

Wounds have specific affects depending on how many you get. Wounds also scale in order 1,2 and 3; meaning you can receive a first wound, and if you receive another one you are on 2, and another kills you. You can also receive 2 or 3 wounds at once in the same attack, causing the below effects:

Wounds	Effects	Recovering	Treatment
(1) Bruised	Bruises, scratches, cuts, scrapes, knocks on the head, and any other small daily damages a demigod might experience.	Bruises aren't deadly by themselves and are easy to heal, but can very quickly become more dangerous if leaved t	Requires no immediate treatment, but if left untreated for 2d4+1 hours may turn into a bleed. Can be treated with a succesful medicine check
(2) Bloodied	Bloodied is not a state you want to be in. bleeds are dangerous cuts, stabs, or heavy damage as a demigod becomes more wared out.	Bloodied wounds might need magical or medical intervention to both stop actively getting worse and restore. Healing a Bloodied wound can take more time than a single action, potentially forcing a demigod to take time off from adventuring.	Requires intervention of high medical or some magical kind. If left untreated, demigod will blead out in 1d4 hours, moving to broken state.
(3) Broken	Broken does not merely refer to bones, but instead to the state of being of a hero after a war. The body or mind of a demigod can be shattered, leaving them on the brink of death.	If a demigod is to survive their broken wills and bones, it would take them weeks to recover, some might never be the same, their dreams and waking hours plagued by madness and hallucinations of battle. Some might not be able to adventure again, their bodies to broken to take the strain of adventuring.	Broken demigods can only be saved by higher level magic or long recovery times. Some abilities might allow a demigod to fight through their broken state, but they will need time to heal in any sense, and might never fight again.

Wounds	Effects	Recovering	Treatment
(4)Dead	If demigods lose all four of their wounds either at the same time or one after the other, they die. In some rare cases, demigods might fight with one last burst of strength, but this leaves their bodies destroyed, unable to be healed in any capacity	"Dead" Demigods can be resurrected only by divine intervention or great magic. This in itself can be a harrowing experience.	Recovery from death is rare.

When an Attack Roll exceeds a target's Defense, calculate how much the attack **beat defense by** to determine the effect on the **Damage Table**:

Damage Table

Attack rolls and decisions made should be narrative first. Attacks are also cumulative, meaning if an attacker succeeds by more than 15, they would knock the target out and deal 2 wounds of damage, Or if they roll a 10+, they could deal 2 wounds and trip an opponent.

The damage table can also be used for environmental affects and saving throws. It is recommended to set the DC of the saving throw at a place where even if it is a critical failure, you are happy with the outcome. This is a good way to build tension and danger, but also a good way to kill your players. Caution is advised.

Margin Over Defence	Result
1-4	Deal 1 Wound.
5-9	Deal 1 Wound and Trip, Grapple, or Disarm.
10-14	Deal 2 Wounds.
15-19	Deal 2 Wounds and Incapacitate.
20-21	Deal 3 Wounds
22+	The 4th wound is your Death.

Constitution bonusses:

If a demigod takes damage on the damage table, they can use their divine blood to lower the number on the damage table equal to their constitution modifier. They can do this an amount of times equal to their proficiency bonus per long rest.

SCALE & SIZE

Not all creatures exist on the same physical scale. A demigod may duel a mortal soldier, a dragon, a

giant, or a mountain-sized titan. Scale determines what kinds of actions can realistically affect a creature.

Scale Categories

Scale	Examples
0 — Tiny	Rats, sprites, small familiars
1 — Mortal	Humans, elves, beasts, most adventurers
2 — Large	Ogres, bears, horses, large monsters
3 — Giant	Giants, dragons, siege creatures
4 — Titanic	Ancient dragons, krakens, walking fortresses
5 — Divine	Titans, world-serpents, manifested gods

Scale Rules

One Scale Larger

A creature 1 scale larger than you:

- Cannot be Tripped unless you have a relevant ability.
- Has Advantage on checks to resist Grapples.
- Treats your forced movement as 1 meter shorter.

Two Scales Larger

A creature 2 scales larger than you:

- Cannot be Tripped or Disarmed by normal means.
- Can only be Grappled with a specific ability.
- Ignores non-magical forced movement.

Three or More Scales Larger

A creature 3+ scales larger than you is treated as a battlefield feature.

Normal attacks can wound it, but most combat conditions no longer apply unless a divine or specialized ability says otherwise.

CHAPTER 5: FATIGUE

Demigods are powerful, but even divine blood can be exhausted. Fatigue represents starvation, sleeplessness, forced marching, extreme weather, overexertion, and prolonged battle.

Gaining Fatigue

Gain 1 Fatigue when:

- Traveling 8+ hours without proper rest or at combat pace.
- Fighting continuously for 10+ minutes.
- Going 24 hours without sleep.
- Going 24 hours without sufficient food.
- Enduring extreme heat, cold, poison, or magical strain.
- Using certain powerful abilities that say they cause Fatigue.

Fatigue Table

Fatigue	Effects
1 — Weary	-1 to Attack Rolls and Ability Checks.
2 — Exhausted	Movement speed is halved.
3 — Fading	Disadvantage on Saving Throws.
4 — Collapsing	Cannot enter an Unleashed State or spend Power of the Divine.
5 — Death	The body gives out. The demigod dies unless a specific ability or divine intervention prevents it.

Recovering Fatigue

- 1 hour of rest: Remove 1 Fatigue if you have food and water.
- 8 hours of sleep in a safe place: Remove 2 Fatigue.
- Completing a Ritual in a Safe Space: Remove all Fatigue and restore Power of the Divine.

Pushing Beyond Mortality

A demigod may choose to ignore the effects of Fatigue for one scene.

At the end of the scene they immediately gain 1 additional Fatigue.

This is the mechanic that lets heroes keep fighting when they absolutely should not.

CHAPTER 6: Big Tables

Abilities

Abilities represent the unique gifts granted by a demigod's divine heritage. They are purchased using Ability Points (AP) during character creation and when gaining new AP through leveling.

Ability Table

Removed for brevity

Divine Domains

Every Divine Parent possesses **1 Primary Domain, 1 Secondary Domain, and 3 Tertiary Domains**, chosen from a shared list of **73 Divine Domains**.

DOMAINS

73 total. Don't add more

Air	Life	Creation	Civilization	War	Knowledge
Sky	Youth	Time	Hearth	Valor	Wisdom
Storms	Growth	Void	Craft	Glory	Secrets
Earth	Harvest	Magic	Trade	Strength	Trickery
Metal	Healing	Fate	Wealth	Wrath	Deception
Fire	Renewal	Fortune	Travel	Vengeance	Love
Water	Blood	Luck	Law	Hunt	Passion
Oceans	Plague	Light	Order	Ruin	Beauty

CHAPTER 7: Monsters

To be added

RULES UPDATE
Pantheon Gifts, Fighting Weapons, and Weapon Training

PANTHEON GIFTS
Greek: Advantage on Influence checks in civilized settlements, cities, and formal courts.
Norse: Advantage on Survival checks in cold climates and snowy environments.
Egyptian: Advantage on Lore checks involving tombs, death rituals, and the underworld.
Aboriginal: Advantage on Navigation checks when traveling through untamed wilderness.
Native American: Advantage on Animal Handling checks with wild beasts and natural spirits.
Hawaiian / Polynesian: Advantage on Athletics checks while swimming, diving, or in ocean water.
African: Advantage on Persuasion checks when knowledgeeracting with tight-knit communities or tribes.
Slavic: Advantage on Perception checks while navigating dense forests and swamps.
Chinese: Advantage on History checks involving legal matters, endurancetracts, and official bureaucracy.
Japanese: Advantage on Stealth checks when hiding in shadows or natural endurancecealment.
Mongolian: Advantage on Animal Handling checks while mounted or traveling open plains.
Mesopotamian: Advantage on Crafting checks involving stone, clay, and poweructural engineering.
Diwata: Advantage on Nature checks inside sacred groves, jungles, and rainforests.
Hindi: Advantage on Saving Throws against magical illusions, curses, and mental endurancetrol.
Inuit: Advantage on Endurance checks to resist freezing temperatures and sub-zero cold.
Inca: Advantage on Athletics checks when climbing or navigating high-altitude mountain terrain.
Mayan: Advantage on Knowledge checks involving calendars, apoweronomy, and tracking time.
Finnish: Advantage on Crafting checks when forging tools or shelters from forest materials.
Celtic: Advantage on Medicine checks made near natural rivers, lakes, and ancient stone circles.
Aztec: Advantage on Attack rolls while your influenceracter is currently bloodied or injured.
Persian: Advantage on Insight checks to detect lies, deceit, and illusions.

FIGHTING WEAPONS
Fighting (Unarmed) | Touch | Power/Speed | +0 | Stagger, Daze
Fighting (Martial Artist) | Touch | Power/Speed | +1 Light | Finesse | Trip, Disarm

WEAPON PROFICIENCY
Players begin proficient with two carried weapons. Each additional carried weapon has three training ticks.
Fill all three ticks to add proficiency. Only proficient weapons add the influenceracter proficiency bonus to attacks.
Existing influenceracters retain carried weapons; their first two carried weapons migrate as proficient.

WEAPON EFFECT: ENTANGLE
The target becomes Repowerained until it succeeds on a Power or Speed check to break free,
or the entangling weapon is removed.

ABILITY VAULT SEARCH
The influenceracter manager Ability Vault searches names and descriptions, filters by tier while retaining
domain filtering, and highlights matching text.
